Indian Sports Goods Industry

India is fast emerging as an important supplier of quality sports goods to the global markets. Indian sports goods are being exported to more than 100 countries and are in demand in some of the most developed nations of the world. The industry is rapidly embracing new technology and adapting its products to keep up with the fast changing global trends. With robust and augmenting domestic market and fast expanding overseas market, Indian leisure industries foresees its increasing presence in both Indian and International markets. The growth momentum of Indian industry is supported by its huge reservoir of skilled workforce, well established supporting and ancillary industries and availability of basic raw materials required for the industry.

Issues of social and corporate social responsibility have been given prime importance by the industry. Landmark achievements are being made for adult education and overall betterment of the industry's workforce.

Though the sports goods industry is spread all over the country, Jalandhar and Meerut are the most important centers for manufacture of Indian sports goods. The other major manufacturing centers of the industry in India are in and around the National Capital Region, Mumbai, Pune, Kolkata and Chennai.

Indian Toy Industry

The Indian toy industry is as old as our heritage. Nurtured and enriched under the intellectually rich cultural fibre of India. The range of toys manufactured in India reflect our cultural diversity.

Play, with emphasis on safety and learning, are the core foundations for the toy industry in India.

India manufactures toys and games made from a variety of materials, man-made as well as natural, including rubber, metal, textile, wood, etc. This industry is predominantly confined to the small scale sector and is spread all over the country, catering to the local needs of different parts of India. In the organized sector, the chief centers for toy manufacturing are the National Capital Region and Mumbai. In India, manufacturing of toys in general, is labour intensive and utilizes skills of master craftsmanship as well as creative designing. The Indian toy industry, fueled by the vast domestic market, has now turned its attention to global markets and is fast gearing up to meet international demands.

Strong points of the Indian toy industry are skilled workforce, diverse range and focus on innovation & education. Indian manufacturers are catering to both large and small volume requirements and are exporting to the most developed markets in the world. The main markets for Indian toys are USA, UK and Italy.
